Addison Conference Center 15650 Addison Road Addison, TX 75001

Speaker Symposium

11:00 am to 11:45 am Presenter: Shelia Stater, birector of Compass Academy (Social & Behavioral Development) Learn how to distinguish between behaviors driven by sensory need vasus other external factors. For the past 15 years, Shelia Stater to behaviors driven by sensory need vasus other external factors. For the past 15 years, Shelia Stater has been working with childrar who strougle with social skills. She will share her real world insights to help you identify if your child has sensory needs while offering practical solutions you can use right now to reduce and eliminate problematic behaviors. Shella has invited a couple for former students to share their experiences with you. Hear what life has been like for them and what strategies they have learned to use to manage their sensory needs while offering practical solutions you can use right now to reduce and eliminate problematic behaviors. Shella has invited a couple for former students to share their experiences with you. Hear what life has been like for them and what strategies they have learned to use to manage their sensory needs while offering practical solutions you can use right now to reduce and eliminate problematic behaviors. Shella has invited a couple in form the strategies they have learned to use to manage their sensory needs while offering practical solutions you can use any other sensors and the sensor processing disorder. For children who are so rigid and only ear a small variety of foods. We know how to help your child become a functional eater. Do not try to do it alone! Come join us for the best tips your child become a functional eater. Do not try to do it alone! Come join us for the best tips your child become a functional eater. Do not try to do it alone! Come join us for the best tips your child become a functional eater. Do not try to do it alone! Come join us for the best tips your child become and your processing disorder. During the discussion, we will look at (1) How vision affects the sensory processing yistern. (2) How a chabi	TIME	PRESENTATION
10:45 am Besty Williams MOTIL, SIPT Certified & Ashley Bower, DTRL. SIPT Certified Betsy Williams and Ashley Bower bring the their expertise in Occupational Though and Sensory Integration to introduce the many fun and inventive ways to use everyday items, as well as sensory specific tools, to regulate behaviors at home and at school. 11:00 am to 11:45 am Presenter: Shella Stater, Director of Compass Academy (Social & Behavioral Development) Learn how to distinguish between behaviors driven by sensory need versus other external factors. For the past 15 years, Shella Stater has been working with children who straiged with social skills be will share he her 'real world' insights to help you identify if your child has sensory needs while offering practical solutions you can use right now to reduce and eliminate problemate behaviors. Shella has invited a couple of more students to share their oxidents and eliminate problemate behaviors. Shella has invited a couple of more students to share their oxidents and eliminate problemate behaviors. Shella has invited a couple of more students to share their experiences with you. Hear what life has been like for them and what strategies they have learned to use to manage their sansory needs. Feeding/Oral Mortor Disorders Presenter: Sally Bober, Ma., C.C.C. & Kim Cousin, Parent Come hear Sally Bober, Ma., C.C.C. & Kim Cousin, Parent Come hear Sally Bober, Speech-Languege Pathologist, and Kim Cousin, a parent, discuss "what in the world can in do with my picky eater?" We will talk about the relationship between oral motor dysfunction, hypersensive gag, history of relix and sensory processing disorder for children who are so rigid and only eat a small venety of foreign with a sist all processing disorder. On not try to do it alone? Come join us for the best tips reveal. Vision: Beyond 20/20 Presenter: Charles Shidlofsky, O.D., FCOVD Charles Shidlofsky, O.D., FCOVD Charles Shidlofsky, O.D., FCOVD Charles Shidlofsky, O.D., FCOVD with gresent on how anyone (adult or chi	10:00 am	Strategies For Implementing Sensory Integration Into the Home and Classroom
Betsy Williams and Ashley Bower bring the their expertise in Occupational Therapy and Sensory Integration to Introduce the many fur and inventive ways to use everyday items, as well as sensory specific tools, to regulate behaviors at home and at school. 11:100 am to Presenter: Shella Slatter, Director of Compass Academy (Social & Behavioral Development) Learn how to dishinguish between behaviors driven by sensory need versus other external factors. For the past 15 years, Shella Slatter has been working with children who struggle with social skills. She will share her "real world" insights to help you identify your child has sensory needs with offering practical solutions you can use right now to reduce and eliminate problematic behaviors. Shella has invited a couple of her former students to share their experiences with you. Hear what life has been like for them and what strategies they have learned to use to manage their sensory needs. 1:00 pm to Presenter: Sally Bobor, M.A., C.C.C. & Kim Cousin, Parent Come here Sally Bobor, M.A., C.C.C. & We will talk about the relationship between oral motor dysfunction, hypersensitive gap, history of reflux and sensory processing disorder for children who are so rigid and only eat a small variety of foods. We know how to help your child become a functional eater. Do not try to do it alone! Come join us for the best tips ever! Sally Bober & Associates is excited to offer a new technology that takes The Listening Program to a whole new level of effectiveness. Bone Conduction listening combines the experience of listening to music through modified headphones adding subtle, synchronized vibration of the skin and skeletal system, engaging the whole body and brain in the listening process. Dr. Jay Lucker, expert in Audiology, says that the Bone Conduction listening "stimulates every inch of the brain." Come learn about this dynamic program and how it can help your family!
Learn how you can utilize biomedical therapy as an adjunct treatment for your child. Research has proven that children and adults had significantly greater improvements in areas such as methylation, glutathione synthesis, oxidative stress reduction, and greater mitochondria function. Laboratory testing available today helps identify and quantify nutritional and metabolic deficiencies, which are prevalent in children with sensory, behavioral, and cognitive disorders. Presentation will cover: (1) How can biomedical therapy positively affect GI disorders, immune dysregulation, neurological deficiencies, and metabolic dysfunction; (2) How can your child benefit from the various special diets; (3) What supplements should your child take, what dosage, and for how long; (4) What tests are appropriate for your child and where do you start? 4:45 pm to Betsy Williams, MOT/L, SIPT Certified Ashley Bower, OTR/L, SIPT Certified Sheila Slatter, Director of Compass Academy Sally Bober, M.A., C.C.C. & Kim Cousin, Parent Charles Shidlofsky, O.D., FCOVD	4:00 pm	Understanding the Role of Biomedical Therapy in Sensory, Behavioral, and Cognitive Disorders
